

WHITENESS PERFECT

Carbamide peroxide whitening gel at 10%, 16% and 22% for supervised at-home use.

**ELECTED FOR THE
THIRD CONSECUTIVE
YEAR THE BEST
TAKE-HOME
WHITENING GEL BY
DENTAL ADVISOR.**

Desensitizing agents:
• Potassium Nitrate • Fluoride.

High level of water: keeps the teeth hydrated, reducing the risk of sensitivity.

Present in over 100 countries.

Safety: pH close to neutral.

WEARING TIME
10% and 16%: 3 to 4 hours a day or overnight use. **22%:** 1 hour a day.

Excellent viscosity: does not run off the tray.

High yield: each syringe of 3g yields up to 9 applications!
